

Application: Application: Aplicación:

Dodge Nitro

Location of cabin filter:

Cabin filter located behind the glove compartment

Tools: No tools necessary

To remove existing filter:

1. Open glove compartment.
2. Press in on the sides of the glove compartment to release the stops and allow the glove compartment to hang down freely on its hinges. (Fig. 1)
3. Locate the cabin filter cover (straight ahead and slightly to the right). (Fig. 2)
4. Push out to release tabs on both sides of the cover and flip down. (Fig. 3)
5. Reach in and pull the first filter out, the second filter is to the right of the first filter reach in and slide to the left align with opening and pull out. (Fig. 4)
6. The filter will have an air flow arrow on the side. Make sure the arrow is pointing down when installing. In the same location you pulled the dirty filter out, slide the first new filter all the way in and slide to the right. Then push in the second new filter. (Fig. 5)
7. Close the cover latch on both sides to secure.
8. Close the glove compartment door and the tabs will slide in place. You are done.
