

Application: Application: Aplicación:

Ford Mustang

Location of cabin filter:

In front of the windshield on the passenger side of the vehicle under the cowl vent screen

To remove existing filter:

1. Open Hood.
2. Locate and remove the two screws (if present) securing the front of the cowl vent screen on the passenger side of the vehicle. (Fig. 1, 2)
3. Carefully open the passenger side cowl vent screen by lifting the cowl straight up and releasing the four retaining clips. (Cowl may be secured by screws not clips.) (Fig. 3, 4)
4. Holding the cowl out of the way, locate the cabin filter and remove. (Fig. 5)
5. Remove filter from housing. (Fig. 6)
6. Replace with clean filter and reverse steps to complete installation.
