

Application: Application: Aplicación:

Saturn Vue

Location of cabin filter:

Under the dash on the passenger side of the vehicle behind the glove compartment

Tools:

Phillips screwdriver

To remove existing filter:

1. Open glove compartment and remove the three screws securing the top of the assembly. (Fig. 1)
2. Close the glove compartment and remove the three screws securing the bottom of the assembly. (Fig. 2)
3. Gently pull outward on the glove compartment assembly until you release the three clips that secure it and the assembly aside. (The assembly is held in place by three metal clips - one on the left hand side and two on the right hand side.) (Fig. 3)
4. Locate the cabin filter door latches. Unlatch them and open door. (Fig. 4)
5. Remove dirty filter.
6. Replace with clean filter, close and latch cabin filter door. (Fig. 5)
7. Align the clips on the glove compartment assembly with the slots located on the frame surrounding the glove compartment and gently push into place.
8. With glove compartment open, align the holes and replace the top three screws.
9. Close glove compartment, align and replace the bottom three screws.
